### Assembly instructions

1. Strip to 33 mm length but do not take off cable jacket.
2. Bead pressing screw and clamp device. Remove cable jacket.
3. Strip the insulation off the wires and tin them.
4. Fan shielding braid and comb out. Thread wires around top.
5. Lock distance sleeve and clamp device.
6. Push mated units backwards over cable (appr. 10 mm).
7. Solder inserts.
8. Push mated units forward until snap-in to contact insert.
9. Strip wires towards shielding ring and shorten.  
too long: wires on sealing ring - not tight  
too short: no contact to wave washer
10. Push assembled unit into carrier sleeve and tighten pressing screw.

## Security notices

The connector must not be plugged or unplugged under load. Non-observance and improper use can result in personal injury.

The connectors have been developed for applications in plant engineering, control and electrical equipment construction. The user is responsible for checking whether the connectors can also be used in other areas of application.

Connectors which are used in circuits with voltages dangerous to the touch may only be installed and used by, or under the supervision of, persons with electrical engineering training, taking into account the applicable regulations and standards.

Plug connectors with enclosure protection IP67 and IP68 are not suitable for use under water. When used outdoors, the plug connectors must be protected separately against corrosion. For further information on the IP protection classes, please refer to the "Technical Information" download centre.

The plug connector is not suitable for mains voltages. Please observe the pollution degree and the overvoltage category. For further information, please refer to the download center "Technical Information".
